An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

After that last page of the specification, inserted:

Abstract

The present invention relates to load cell isolation in hospital bed weighing systems. The invention comprises of a cell block fixed to a bed frame and a mount fixed to a base frame. The mount includes a bore made of a first material. The cell block has a stud extending from the cell block which is inserted into the bore. The bore has a liner lying in the bore so that the stud engages the liner, wherein the liner is made of a second material that is more lubricous than the material that the mount is made from, and wherein a space lies between the stud and the mount to permit relative movement between the stud and the mount. The liner may be affixed to either the mount or the stud, and in some embodiments it may consist of a O-ring, a coating, a sleeve, or a plate lying in the bore.
